Complete overall solution at all levels

For many years now, Swegon’s system for demand-controlled ventilation has set the standard for combining optimum indoor climate with minimum energy use. Over time knowledge regarding demand control and user friendliness has been expanded. This was vital as development within the industry is moving towards significantly increased demands – be it environmental, net operating income or comfort. Based on experience, we have developed the WISE system from scratch, where all products interact with each other to meet both current and future demands. WISE is based on unique technologies, which combine to form a reliable and flexible system.

Documentation structure

To support installation of a WISE system, Swegon has created a documentation structure.

System guide
The system guide provides the designer with help and advice on the structure of systems and rooms.

Project planning guides
Our project planning guides provide assistance to the respective disciplines involved with issues that can arise when designing their part of a system.
Operating network and radio network

The WISE system is built up of an operating network and a radio network. The operating network is the fixed IP-network while the radio network is based on a patented robust wireless communication system. This project planning guide describes how the operating network and radio network are structured and how the different components in the WISE system are connected. For detailed information about the whole system, see the WISE System guide.

NOTE! The radio and operating networks shown in this document are only examples of how these can be structured. The radio and operating networks are built up depending on the need and function in the building project.
Connection of the operating network

The base products in WISE are interconnected through a hardwired IP network. It is this IP network that is called the “operating network”. To make a comparison with mobile telephone system you can compare the base products with the fixed infrastructure that permits the wireless system.

Base products are:
- SuperWISE II / SuperWISE II SC / SuperWISE II 2K / SuperWISE II 2K SC
- WISE DIR
- AHU, for example, GOLD
- Swegon CONNECT (only SuperWISE II SC and SuperWISE II 2K SC)

NOTE!
- Swegon recommends that the operating network is segmented solely for Swegon products, this is to ensure operation of the indoor climate system.
- Commissioning of the WISE system cannot take place unit the operating network is operational.

Depending on the conditions in the project, Swegon supports two solutions for how the operating can be structured:

1. Swegon network - no operating network
   - For example, an old property without an existing infrastructure for IP-network or BMS.
   - Swegon provides documentation for project planning, cable routing, IP addressing, etc.
   - For smaller installation, all Swegon products are connected directly to the switch in the SuperWISE cabinet.
   - For larger installations additional switches can be added.

2. Property owner provides the operating network
   - Usually large projects.
   - The operating network is managed in its entirety by the property owner.
   - Swegon products are assigned connections and IP-addresses to the operating network by the property owner.

NOTE! The radio and operating networks shown in this document are only examples of how these can be structured. The radio and operating networks are built up depending on the need and function in the building project.
Physical connections
Markings of the physical connections to the operating network are specified below for Swegon’s products.

<table>
<thead>
<tr>
<th>Product</th>
<th>Markings of the physical connections</th>
</tr>
</thead>
<tbody>
<tr>
<td>SuperWISE II</td>

</table>
SuperWISE II / SuperWISE II SC

SuperWISE / SuperWISE SC are the common points in the system where all information is linked together to be presented on web pages and external communications protocol, e.g. Modbus.

**Electrical data**

- **Power supply:** 230V 10 A

---

### Connection of SuperWISE to the main control system

SuperWISE manages operating information to and from the BMS via ModBus TCP or BACnet IP.

SuperWISE has the BACnet profiles BACnet Building Controller (B-BC) and BACnet Gateway (B-GW) implemented and uses BACnet protocol revision 14. Descriptions of all specific possibilities via BACnet in SuperWISE can be found in the PICS document.

The main control system is connected via the Ethernet port to Switch (3), where ports 3-8 are intended for e.g. BMS, or directly to the SuperWISE controller.

1. SuperWISE control unit - Main communication unit
2. Swegon Connect – Router (is only included in SuperWISE II SC/SuperWISE II 2K SC). Communicates on the mobile network and ideally on the 4G network. If the cabinet contains Swegon Connect, the cabinet must be placed so that it can receive mobile signals. The cabinet can be supplemented with an extra antenna for increased signal strength (see Accessories) for improved mobile coverage. See the separate documentation for Swegon Connect on www.swegon.com
3. Switch - 8 ports (if more ports are required, install a supplementary switch outside of the cabinet)
   - Port 1: SuperWISE control unit
   - Port 2: Swegon Connect
   - Port 3-8: Free for e.g. WISE DIR/AHU/BMS
4. Main switch - Connection of the power supply
5. Transformer
6. Antenna, only included in SuperWISE II SC/SuperWISE II 2K SC
7. Earth connection

---

Note! Swegon Connect (2) and antenna (6) only included in SuperWISE II SC.
**SuperWISE II, SuperWISE II SC**

Antenna, only included in SuperWISE II SC

*Minimum free clearance to nearby installations.

Holes for installation (mm), SuperWISE II, SuperWISE II SC. 4x installation screws (clearance hole Ø = 8 mm), screw selection based on the substrate.

WISE DIR

The majority of calculations for the system are made here. WISE DIR is a central control unit in WISE which wirelessly collects data, processes and sends data back to a group of climate and ventilation products to control and regulate the indoor climate. Each system needs at least one WISE DIR to work. WISE DIR communicates with SuperWISE via an Ethernet cable.

WISE DIR, connection.

NOTE! Antenna must always be installed vertically.

GOLD

For more information about the connection of the GOLD air handling unit, see www.swegon.com.
Connection in the radio network

The room products in WISE communicate wirelessly in the radio network by sending signals to WISE DIR. For the best radio communications place WISE DIR, which is physically connected to the operating network, as central as possible in the radio network.

The system’s room products communicate wirelessly with the built-in radio transmitter. Products with a power supply work both as a transmitter and receiver and boost/repeat the system’s radio communications. Products powered by a battery act only as transmitters and receivers of information.

NOTE! During commissioning, the products are paired with the help of TuneWISE.

The WISE system comprises room products for both air and waterborne climate systems, all the requisite control equipment, as well as room units and sensors. All this is linked together to form an entirety via a unique patented system for wireless communications. The wireless system is based on a meshed structure where each unit forwards information about nearby products, which helps the network to work around obstacles. This also means that the system can quickly repair itself if a product, for example, loses power.
**Climate products**

**WISE Parasol**
Comfort module with integrated radio module that demand controls air flow and cools/heats via built-in water coils Measures air flow.

**Electrical data**
- **Power supply:** 24V AC ±15% 50 - 60Hz
- **Connections pipe dim.**
  - **Power:** Screw terminal max. 2.5mm²
  - **Valve actuator:** Push-in spring force connections, max. 1.5 mm²
- **Total power consumption:** Max 30 VA.
- **Max. power consumption:** See table below

<table>

**Example:**
*WISE Parasol in standard version with the following options: Actuator for cooling and heating as well as WISE SMA, gives a total power consumption of 5.1 + 7 + 7 + 0.8 = 19.9 VA*

**Connection example WISE Parasol**
*(terminal 2 cooling, terminal 3 heating)*

**WISE Parasol with factory-fitted components**

**A. WISE CU - Controller Unit**
- Connection of the power supply
- Connection of the valve actuator for heating and cooling (accessory)

**Connection of the thermal actuator**

**Connection of actuator with 0-10 V control signal**
*NOTE! 24 V DC supply*

**Connection of relay for connection of 3 or more actuators**
WISE Colibri Ceiling

Air diffuser with integrated radio module that demand controls air flow and controls an external heat source. Measure air flow, supply air temperature, room temperature and presence.

Electrical data

Power supply: 24V AC ±15% 50 - 60Hz

Connections pipe dim.

- Power: Push-in spring force connections, max. 2.5 mm²
- Valve actuator: Push-in spring force connections, max. 1.5 mm²

Max. power consumption: See table below

<table>
<thead>
<tr>
<th>Variant</th>
<th>VA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ø160, Ø250</td>
<td>Default</td>
</tr>
<tr>
<td></td>
<td>8</td>
</tr>
</tbody>
</table>

*Applies to products with CU ver. 2, delivered from 10/01/2019

WISE Colibri C

A. Diffuser connection

- Connection of the power supply (2 and 3)
- Connection of the valve actuator for heating (1) (accessory)

Connection example WISE Colibri C

- Connection of thermal actuator
- Connection of actuator with 0-10 V control signal. NOTE! 24 V DC supply
- Connection of relay for connection of additional actuators
WISE Sphere Ceiling

Air diffuser with integrated radio module that demand controls air flow and controls an external heat source. Measures air flow, supply air temperature, room temperature and presence.

Electrical data

Power supply: 24V AC ±15% 50 - 60Hz
Connections pipe dim.
Power: Push-in spring force connections, max. 2.5 mm²
Valve actuator: Push-in spring force connections, max. 1.5 mm²
Max. power consumption: See table below

<table>
<thead>
<tr>

*Applies to products with CU ver. 2, delivered from 10/01/2019

WISE Sphere Ceiling

A. Diffuser connection

- Connection of the power supply (2 and 3)
- Connection of the valve actuator for heating (1) ( accessory)

Connection example WISE Sphere C

Connection of thermal actuator

Connection of actuator with 0-10 V control signal.

NOTE! 24 V DC supply

Connection of relay for connection of additional actuators
WISE Sphere Free
Air diffuser with integrated radio module that demand controls air flow and controls an external heat source. Measures air flow, supply air temperature, room temperature and presence.

Electrical data
Power supply: 24V AC ±15% 50 - 60Hz
Connections pipe dim.

- Power: Push-in spring force connections, max. 2.5 mm²
- Valve actuator: Push-in spring force connections, max. 1.5 mm²

Max. power consumption: See table below

**WISE Measure**
Measurement unit with integrated radio module, measures airflow and duct temperature.

**Electrical data**
- Power supply: 24V AC ±15% 50 - 60Hz
- Connections pipe dim.
  - Power: Screw terminal max. 2.5mm²
- Max. power consumption: 3 VA

**A. WISE CU - Controller Unit**
- Connection of the power supply
System products

The wall mounted system products in WISE are available in different designs. Some are powered by 24 V power supply while some are fitted with a battery and can be chosen to use a power supply OR battery.

NOTE: function for combined power supply and battery operation is not available.

All products communicate wirelessly via radio technology to the WISE system.

Remove the front-piece

Fit the front-piece

Back piece

1. Screw mounting on the wall, screw max. Ø4.5 mm, min. length 20 mm, screws not supplied.
2. Knock-outs for cable entry for wall mounting.
3. Hole for mounting in a junction box.
4. Opening for cable entry for mounting in a junction box.

Overview - power supply

WISE RTA
WISE IAQ
WISE IRT
WISE OCS
WISE IORE
WISE IRE
WISE WCS
WISE RTS

Screw mounting on the wall, screw max. Ø4.5 mm, min. length 20 mm, screws not supplied.
WISE RTA

WISE RTA is a setpoint adjuster that measures the temperature and has as well as a digital input for connection of e.g. a card reader.

**Electrical data**

- **Power supply:** 24V AC ±10% 50-60 Hz, 24V DC (15-30V DC)
- **Max. power consumption:** 5 VA
- **Battery:** 2 of the type AA, LiSOCl2 of 3.6 V (Li-ion)
- **Cable rating, connector:** Max. 1.5 mm², push-in spring force connection
- **External input:** 1 digital (open/close or off/on), max. 1.5 mm², push-in spring force connection

**Recommended placement of WISE RTA.**

**WISE RTA - power supply with battery**

**WISE RTA - back-piece, power supply and connection**

**24V AC/DC Digital input for external connection.**

**Battery holder**
**WISE IAQ**

WISE IAQ is a sensor for wall mounting that measures temperature and air quality in the room.

**Electrical data**

- **Power supply:** 24 V AC ±10% 50-60 Hz, 24V DC (15-30V DC)
- **Max. power consumption:** 2 VA
- **Cable rating, connector:** Max. 1.5 mm², push-in spring force connection

**Recommended placement of WISE IAQ**

1,2-1,8 m

![WISE IAQ](image1.png)

![WISE IAQ - back-piece, power supply](image2.png)
WISE IRT

WISE IRT is a temperature sensor for wall mounting that measures the temperature in the room and the surface temperature on the floor.

**Electrical data**

- **Power supply:** 24V AC ±10% 50-60 Hz, 24V DC (15-30V DC)
- **Max. power consumption:** 5 VA
- **Battery:** 1 of the type AA, LiSOCl2 of 3.6 V (Li-ion)
- **Cable rating, connector:** Max. 1.5 mm², push-in spring force connection
WISE OCS

WISE OCS is a combined sensor. The unit has a PIR sensor to detect occupancy and sensors to measure air humidity and temperature.

Electrical data

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Specification</th>
</tr>
</thead>
<tbody>
<tr>
<td>Power supply</td>
<td>24 V AC ±10% 50-60 Hz, 24 V DC (15-30 V DC)</td>
</tr>
<tr>
<td>Max. power consumption</td>
<td>1 VA</td>
</tr>
<tr>
<td>Cable rating, connector</td>
<td>Max. 1.5 mm², push-in spring force connection</td>
</tr>
</tbody>
</table>

Recommended placement of WISE OCS

Detection range
**WISE IORE**

WISE IORE is a unit that can control products in the system without its own radio communication. The unit can power several valve actuators as long as the total power consumption does not exceed 18 VA. WISE IORE has an analogue input (0-10 V) and input for a condensation sensor.

**Electrical data**

- **Power supply:** 24 V AC ±10% 50-60 Hz, 24V DC (15-30V DC)
- **Max. power consumption:** 25 VA
- **Max. power output:** 18 VA
- **Cable rating, connector:** Max. 1.5 mm², push-in spring force connection

**Recommended placement of WISE IORE when controlling radiators**

**Placement of WISE IORE, installed on a waterborne product without radio communications**

**Connection example WISE IORE**

**WISE IORE - back-piece, power supply and connection**

**ORE controlling heating and cooling thermo-actuator and condensation sensor**
IORE controlling radiator heating 1 thermo-actuator

IORE controlling radiator heating 2 thermo-actuators

IORE controlling radiator heating 3 or more thermo-actuators

IORE controlling radiator heating 0-10 V
WISE IRE

WISE IRE can take in analogue/digital signals from different sensors in the system that are not equipped with radio communications, and send these wirelessly to WISE DIR. For supplying with 24 V, WISE IRE can also be used as a communication bridge. When two nodes have limited radio communications, WISE IRE is placed between these and boosts communications.

Electrical data

- **Power supply:** 24V AC ±10% 50-60 Hz, 24V DC (15-30V DC)
- **Max. power consumption:** 1 VA
- **Battery:** 1 of the type AA, LiSOCl2 of 3.6 V (Li-ion)
- **Cable rating, connector:** Screw terminal max. 1.5mm²
- **External input:** 1 digital (open/close or off/on) or analogue 0-10 V DC

1. Connection of the power supply G0 0V AC / -0V DC
2. Connection of the power supply G 24V AC/DC
3. Ground
4. Digital or analogue signal 0-10 V

**NOTE!** Terminals 1 and 3 are connected inside WISE IRE. It is important to check the connection of the power supply so that the potential on the ground is correct.
**WISE WCS**

WISE WCS is a window contact that consists of a main part and a magnetic part. It detects whether the window or door where it is installed is open. If this happens contact between the parts is broken and a signal is sent to the WISE system to activate the required functions. The unit communicates wirelessly and is powered by a 3.6 V Lithium-ion battery.

**Electrical data**

- Power consumption: 300 mAh/year
- Battery: 1 of the type AA, LiSOCl2 of 3.6 V (Li-ion)

**Recommended placement of WISE WCS**

Distance between sensor and magnet 3-20 mm

**WISE WCS - power supply with battery**

**WISE WCS**
WISE RTS

WISE RTS is a wireless temperature sensor for wall mounting. The unit communicates wirelessly and is powered by a 3.6 V Lithium-ion battery.

**Electrical data**

<table>

Recommended placement of WISE RTS
VA-consumption products this example

**WISE Colibri Ceiling:** 8 VA / pcs

**Accessories**

- **Radiator actuator:** 7 VA / pcs
- **WISE IAQ, air quality, temperature and humidity sensor:** 2 VA
- **WISE RTA, temperature sensor and setpoint adjuster:** 5 VA
- **WISE RTS, temperature sensor:** 0 VA (battery)
- **WISE WCS, window contact:** 0 VA (battery)

Sum of the combined maximum consumption (VA) from the selected products and accessories should be used when selecting the transformer.

Installation must be carried out by a qualified electrician and depending on how cable routing in the room is carried out an appropriate cable cross-section must be used. National regulations must be observed.
VA-consumption products this example
PARASOL Zenith
- WISE IORE, input/output unit: 5 VA
- Cooling and heating actuator: 7 VA / pcs

Accessories
- Condensation sensor CG-IV: 0 VA
- WISE OCS, presence detector incl. temperature and humidity sensor: 1 VA
- WISE RTA, temperature sensor and setpoint adjuster: 5 VA
- WISE RTS, temperature sensor: 0 VA (battery)
- WISE WCS, window contact: 0 VA (battery)

Sum of the combined maximum consumption (VA) from the selected products and accessories should be used when selecting the transformer.

installation must be carried out by a qualified electrician and depending on how cable routing in the room is carried out an appropriate cable cross-section must be used. National regulations must be observed.
Office with waterborne climate DCV

VA-consumption products this example

WISE Parasol: 5.1 VA
Cooling and heating actuator: 7 VA / pcs

Accessories

Condensation sensor CG-IV: 0 VA
WISE IAQ, air quality, temperature and humidity sensor: 2 VA
WISE RTA, temperature sensor and setpoint adjuster: 5 VA
WISE RTS, temperature sensor: 0 VA (battery)
WISE SMA, Air quality and humidity sensor: 0.8 VA
WISE SMB, sensor module for temperature and presence in comfort module: 0.6 VA
WISE WCS, window contact: 0 VA (battery)

Sum of the combined maximum consumption (VA) from the selected products and accessories should be used when selecting the transformer.

Installation must be carried out by a qualified electrician and depending on how cable routing in the room is carried out an appropriate cable cross-section must be used. National regulations must be observed.
Conference room with water and airborne climate

VA-consumption products this example
WISE Parasol: 5.1 VA / pcs
Cooling actuator: 7 VA / pcs
WISE Colibri Ceiling: 8 VA / pcs

Accessories
Condensation sensor CG-IV: 0 VA
Radiator actuator/heating actuator: 7 VA / pcs
WISE IAQ, air quality, temperature and humidity sensor: 2 VA
WISE RTA, temperature sensor and set-point adjuster: 5 VA
WISE RTS, temperature sensor: 0 VA (battery)
WISE SMA, Air quality and humidity sensor: 0.8 VA
WISE SMB, sensor module for temperature and presence in comfort module: 0.6 VA
WISE WCS, window contact: 0 VA (battery)

Sum of the combined maximum consumption (VA) from the selected products and accessories should be used when selecting the transformer.

Installation must be carried out by a qualified electrician and depending on how cable routing in the room is carried out an appropriate cable cross-section must be used. National regulations must be observed.
Office with airborne climate in balance

**VA-consumption products this example**
- WISE Colibri Ceiling: 8 VA / pcs
- WISE Damper: 8 VA / pcs

**Accessories**
- Radiator actuator: 7 VA / pcs
- WISE IAQ, air quality, temperature and humidity sensor: 2 VA
- WISE RTA, temperature sensor and setpoint adjuster: 5 VA
- WISE RTS, temperature sensor: 0 VA (battery)
- WISE SMA, Air quality and humidity sensor: 0.8 VA
- WISE WCS, window contact: 0 VA (battery)

Sum of the combined maximum consumption (VA) from the selected products and accessories should be used when selecting the transformer.

Installation must be carried out by a qualified electrician and depending on how cable routing in the room is carried out an appropriate cable cross-section must be used. National regulations must be observed.
Classroom with airborne climate in balance

VA-consumption products this example

WISE Damper supply air: 8 VA
WISE Damper extract air: 8 VA

Accessories
Radiator actuator: 7 VA / pcs
WISE IAQ, air quality, temperature and humidity sensor: 2 VA
WISE OCS, presence detector incl. temperature and humidity sensor: 1 VA
WISE RTA, temperature sensor and setpoint adjuster: 5 VA
WISE RTS, temperature sensor: 0 VA (battery)
WISE WCS, window contact: 0 VA (battery)

Sum of the combined maximum consumption (VA) from the selected products and accessories should be used when selecting the transformer.

Installation must be carried out by a qualified electrician and depending on how cable routing in the room is carried out an appropriate cable cross-section must be used. National regulations must be observed.
Classroom with airborne climate with fume hood ventilation in balance

VA-consumption products this example
WISE Damper extract air: 8 VA
WISE Damper supply air: 8 VA
WISE Measure: 3 VA

Accessories
Radiator actuator: 7 VA / pcs
WISE IAQ, air quality, temperature and humidity sensor: 2 VA
WISE IRE 1 VA
WISE OCS, presence detector incl. temperature and humidity sensor: 1 VA
WISE RTA, temperature sensor and setpoint adjuster: 5 VA
WISE RTS, temperature sensor: 0 VA (battery)
WISE WCS, window contact: 0 VA (battery)

Sum of the combined maximum consumption (VA) from the selected products and accessories should be used when selecting the transformer.

Installation must be carried out by a qualified electrician and depending on how cable routing in the room is carried out an appropriate cable cross-section must be used. National regulations must be observed.
Open-plan office with water and airborne climate with balanced extract air

VA-consumption products this example

WISE Colibri Ceiling: 8 VA / pcs
WISE Damper: 8 VA
WISE Parasol: 5.1 VA / pcs
  Cooling actuator: 7 VA / pcs

Accessories
Condensation sensor CG-IV: 0 VA
Radiator actuator/heating actuator: 7 VA / pcs
WISE IAQ, air quality, temperature and humidity sensor: 2 VA
WISE IORE, input/output unit: 5 VA
WISE RTA, temperature sensor and setpoint adjuster: 5 VA
WISE RTS, temperature sensor: 0 VA (battery)
WISE SMA, Air quality and humidity sensor: 0.8 VA
WISE SMB, sensor module for temperature and presence in comfort module: 0.6 VA
WISE WCS, window contact: 0 VA (battery)

Sum of the combined maximum consumption (VA) from the selected products and accessories should be used when selecting the transformer.

Installation must be carried out by a qualified electrician and depending on how cable routing in the room is carried out an appropriate cable cross-section must be used. National regulations must be observed.
Hotel room

Extract air damper (not pictured), WISE damper PARAGON

Supply air damper (not pictured), WISE damper PARAGON

Comfort module for hotel, PARAGON with WISE CU

VA-consumption products this example

PARAGON
WISE CU: 2.3 VA
PARAGON b T-SAK-VAV-125-WISE: 2 VA
PARAGON b T-EAK-VAV-125-WISE: 2 VA
Cooling and heating actuator: 7 VA / pcs

Accessories
Condensation sensor CG-IV: 0 VA
Key card holder SYST SENSO II: 0 VA
WISE IORE, input/output unit: 1 VA
WISE RTA, temperature sensor and setpoint adjuster: 5 VA
WISE WCS, window contact: 0 VA (Battery)

Sum of the combined maximum consumption (VA) from the selected products and accessories should be used when selecting the transformer.

Installation must be carried out by a qualified electrician and depending on how cable routing in the room is carried out an appropriate cable cross-section must be used. National regulations must be observed.
We make every breath count.
