

Installation Multi-section SILVER C SD

1. General

The multi-section is an extra unit section, available in two lengths, with optional combinations of cover panels/ inspection doors on the inspection side. The cover panels are easy to dismantle.

The multi-section is available for SILVER C SD. For possible combinations of multi-sections and units, see the example.

Drip tray available as an optional extra.

The multi-section is available, as a special version, with installed accessories from the factory, for example an air heater/air cooler, dampers, etc.

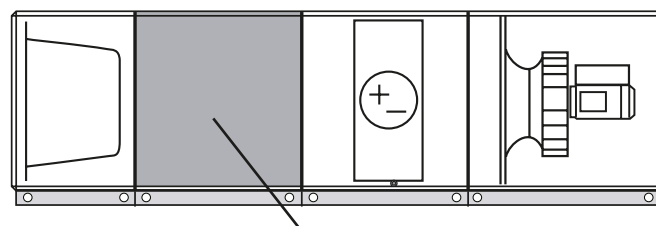

2. Installation

The multi-section should be located between the other unit sections of the SILVER C, see the example.

If splitting or joining air handling unit sections is necessary, refer to the installation instructions for SILVER C.
