

Air diffusers for any environment

Decoline

Unique opportunities
with design in focus

LET THE AIR HARMONISE WITH THE SURROUNDINGS

Swegon now makes it possible to combine an excellent indoor climate with colour and form. Choose a pattern and let the diffuser stand out or blend in.

Stone, wood, carbon fibre or metal?

With Decoline anything is possible!

A good product can always be improved

In order to deliver high-quality products, our aim is not to be satisfied, but to constantly improve our products. With our own R&D centre for airborne products, we ensure that our development truly produces a result.

Our objective is to be the leading company in our industry, also in terms of environmentally friendly operations and products. As a product that does not maintain a high quality is rarely a product that is good for the environment. That's why the whole of our business is both environment and quality certified.

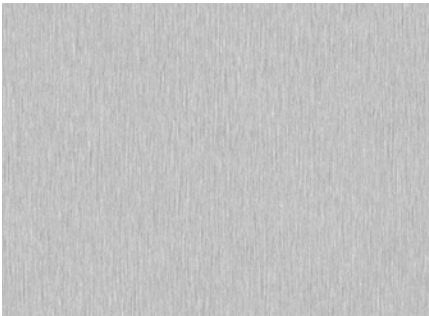

DECOLINE - AIR DIFFUSERS FOR ANY ENVIRONMENT

Each environment is a unique combination of style, colour and material. With Decoline the appearance that is right for environment in which the air diffusers will be installed is chosen. Wood for a vivid impression, stone and leather for exclusivity.

Should the air diffusers be accentuated or concealed? With Decoline there are many patterns to choose between. 12 samples are shown below, but there are more available on request. So there's something to suit most environments!

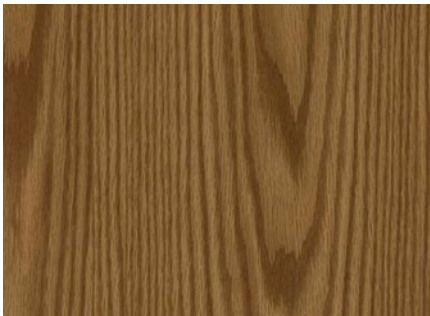

Birch

Brushed metal

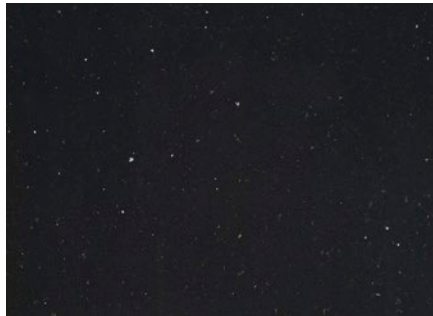

Brown leather
