

Installation spacer section, TCGA with upward, downward or rear duct connection GOLD/SILVER C, sizes 004-040

1. General

A spacer section with upward, downward or rear duct connection can be used if required, see the basic layout diagram.

The upward and rear duct connections are equipped with a connection frame for a slip-clamp connection. Downward duct connections are equipped with a connection frame with predrilled holes for screw connection.

The cover panel on the inspection side is easily removed.

For reasons of safety, the duct connection is fitted with a grille plate.

Spacer sections are available for GOLD/SILVER C RX/PX/CX/SD size 004-040.

2. Installation

The spacer section is placed as shown in the basic layout diagram below.

For assembly, see the separate instruction Installation of Duct Accessories.
