Installation, net adapter, IQnavigator TBLZ-1-70 GOLD

1. General

The net adapter consists of cable and 230/24 V transformer. For indoor use only.

2. Function

Hand-held terminal IQnavigator standard (without WLAN):

If the hand-held terminal is to be located at such a distance that the standard cabel, between the terminal and the control unit, isn't long enough, the accessory net adapter TBLZ-1-70 must be used as power supply to the hand-held terminal.

Hand-held terminal IQnavigator with WLAN (accessory):

The batteries of the hand-held terminal are normally charged via the standard cable, between the terminal and the control unit. If charging is to be carried out in a different location, the accessory net adapter TBLZ-1-70 must be used.

3. Installation

The net adapter is connected to the hand-held terminal and a wall socket.

Shielded net work cable with RJ45 contacts, for communication between terminal and control unit, isn't included in the delivery from Swegon.

4. Technical data

Colour   Black
Cable length   2 meters
