= Low airflow.

= Normal airflow.

= High airflow.

Energy saving

The system includes the ECON operating mode for saving energy. It is automatically activated when no one has been in the room for a certain period of time.
CONDUCTOR W4 returns to the AUTO operating mode as soon as someone enters the room.

Contact and information

Get in touch with the person responsible for the building if the indoor climate system does not operate as it should or if the battery has run out of power.
Information about the CONDUCOR W4 and how to contact Swegon is available at our website: www.swegon.com
